Technical Skills

Languages: JavaScript, CSS, HTML

Frameworks/Libraries: React, Express, Node.js

Databases: SQL

APIs: RESTful API Design and Implementation

Tools: Git and GitHub, Slack, Trello

Projects

FULL-STACK SCHOOL APP: [GitHub Link](#)

A full-stack web application that provides a way for users to administer a school database containing information about courses. Students can retrieve a list of courses, view details of a specific course, as well as creating, updating and deleting courses in the database. Students are required to create an account and sign in to make changes to the database.

Built with **React, Node.js, Express, SQL and Sequelize ORM** for data modeling, validation and Persistence

REACT GALLERY: [GitHub Link](#) [Live Demo](#)

This image gallery app was created using **React**. Using **React Router**, routes are set up for three default topic pages and a search page. Images are displayed from the **Flickr API** using Axios to fetch data. This project was bootstrapped with Create React App.

PHRASE HUNTER GAME: [GitHub Link](#) [Live Demo](#)

This is a browser-based, word guessing game called "Phrase Hunter." This project focuses on OOP (Object Oriented Programming). In the game, the player tries to guess a random, hidden phrase by clicking on letters on an onscreen keyboard. Built with **vanilla JavaScript, HTML, and CSS**
